F. The project cost means the estimated, entire cost of the project including, but not limited to, building construction, site preparation, landscaping, and all site improvements. The project shall not be segmented to avoid being subject to the consultant fee, but the Commission may allow reasonable phasing of the project. The applicant shall submit estimated project costs at the Commissions request, but the

lack of such estimated project costs shall not avoid the payment of the consultant fee.

Section 7 -Permits and Conditions:

A. If the Commission, after a public hearing determines that the activities which are subject to the permit application or the land and water uses which will result therefrom are likely to have a significant individual or cumulative effect upon the resource area values protected by this bylaw, the Commission, within 21 days of the close of the hearing, shall approve or deny a permit for the activities-requested. If it approves a permit the Commission shall impose conditions that the Commission deems necessary or desirable to protect those values, and all activities shall be done in accordance with those conditions. The Commission shall take into account the cumulative adverse effects of loss, degradation, isolation, and replication of protected resource areas throughout the community, resulting from past activities, permitted and exempt, and foreseeable future activities.

B. The Commission is empowered to deny a permit for failure to meet the requirements of this bylaw; for failure to submit necessary information and plans requested by the Commission; for failure to meet the design specifications, performance standards, and other requirements in regulations of the Commission; for failure to avoid or prevent unacceptable significant or cumulative effects upon the resource area values protected by this bylaw; and where no conditions are adequate to protect those values. Due consideration shall be given to any demonstrated hardship on the applicant by reason of denial, as presented at the public hearing.

C. To prevent wetland loss, the Commission shall require applicants to avoid wetland alteration wherever feasible or minimize wetland alteration where alteration is unavoidable, with the requirement of full mitigation. The Commission may authorize or require replication of wetlands as a form of mitigation, but only with adequate security, professional design, and monitoring to assure success, because of the high likelihood of failure of replication.

D. Lands within 100 feet of specific resource areas, and within 200 feet of rivers and streams, are presumed important to the protection of these resources because activities undertaken in close proximity to wetlands, rivers and streams, and other resources have a high likelihood of adverse effect upon them either immediately, as a consequence of construction, or over time, as a consequence of daily operation or existence of the activities. These adverse impacts from construction and use can include, but not be limited to, erosion, siltation, loss of groundwater recharge, poor water quality, and loss of wildlife habitat. The Commission therefore may require that the applicant maintain a strip of continuous, undisturbed vegetative cover within aforesaid 100 or 200-foot area, unless the applicant convinces the Commission that the area or part of it may be disturbed without harm to the values protected by this bylaw.

E. In the case of areas within 200 feet of rivers and streams, no permit issued hereunder shall permit any activities unless the applicant, in addition to meeting the otherwise applicable requirements of this bylaw, has proved by a preponderance of the evidence that (1) there is no practicable alternative to the proposed-project with less adverse effects, and (2) should there be no practicable alternative, that such activities, including proposed mitigation measures, will have no significant adverse impact on the areas or values protected by this bylaw. The Commission shall regard as practicable an alternative, which is reasonably available and capable of being done after taking into consideration the proposed property use, overall project purposes, logistics, existing technology, costs of the alternatives, and overall project cost.

F. A permit shall expire three (3) years from the date of issuance. Notwithstanding the above, the Commission in its discretion may issue a permit for a period up to five (5) years from the date of issuance for recurring or continuous maintenance work, provided that annual notification of time and location of work is given to the Commission. Any permit may be renewed once for an additional one-year periods, provided that a request for a renewal is received in writing by the Commission thirty (30) days prior to the expiration date. Notwithstanding the above, a permit may contain requirements which shall be enforceable for a stated number of years, indefinitely, or until permanent protection is in place, and shall apply to all owners of the land.

G. For good cause the Commission may revoke or modify a permit or determination issued under this bylaw after notice to the holder of the permit or determination, notice to the public, abutters, and town boards pursuant to Section 5D of this bylaw, and a public hearing.

H. The Commission may combine the permit issued under this bylaw with the Order of Conditions issued under G.L. Ch. 131, § 40, and its implementing regulations, 310 CMR 10.00 as they may be amended.

I. No work proposed in any permit application shall be undertaken until the permit issued by the Commission with respect to such work has been recorded in the Registry of Deeds or, if the land affected is registered land in the Land Court, and until the holder of the permit certifies in writing to the Commission "that the permit has been recorded.

Section 8 -Security:

A. As part of a permit issued under this bylaw, in addition to any security required by any other municipal or state board, agency, or official, the Commission may require that the performance and observance of the conditions imposed thereunder (including conditions requiring mitigation work) be secured wholly or in part by one or both of the following methods:

1. By a proper bond or deposit of money or negotiable securities or other undertaking of financial responsibility in an amount determined by the Commission to be sufficient and payable to the Town of Saugus upon default;
2. By accepting a conservation restriction, easement or other covenant enforceable in a court of law, executed and duly recorded by the owner of record (or registered, in the case of registered land), running with the land to the benefit of the Town of Saugus whereby the permit conditions shall be performed and observed before any lot may be conveyed other than by mortgage deed.

Section 9 -Enforcement.

- A. The Commission, its agents, officers and employees, shall have the authority to enter upon privately owned land for the purpose of carrying out its duties under this bylaw and may make or cause to be made such examination, surveys, or sampling as the Commission deems necessary, subject to the constitutions and laws of the United States and the Commonwealth.
- B. The Commission shall have authority to enforce this bylaw, its regulations, and permits issued thereunder by violation notices, and civil and criminal court actions. Any person who violates provisions of this bylaw may be ordered to restore the property to its original condition and take other action deemed necessary to remedy such violations, or may be fined, or both.

Each day or portion thereof during which a violation continues, or unauthorized fill or other alteration remains in place, shall constitute a separate offense, and each provision of the bylaw, regulations, permits, or administrative orders violated shall constitute a separate offense.

Section 10 -Regulations:

- A. Following a public hearing, rules and regulations shall be promulgated by the Commission to effectuate the purposes of this bylaw. However, failure by the Commission to promulgate rules and regulations shall not act to suspend or invalidate the effect of this bylaw.

B. At a minimum, these regulations shall define key terms in this bylaw not inconsistent with the bylaw and procedures governing the amount and filing of fees.

Section 11- Burden of Proof:

The applicant for a permit shall have the burden of proving by a preponderance of the credible evidence that the work proposed in the permit application will not have unacceptable significant or cumulative effect upon the resource area values protected by this bylaw. Failure to provide adequate evidence to the Commission supporting this burden shall be sufficient cause for the Commission to deny a permit or grant a permit with conditions.

Section. 12 - Relation to the Wetlands Protection Act:

This bylaw is adopted under the Home Rule Amendment of the Massachusetts Constitution and the Home Rule Statutes, independent of the G.L. Ch. 131, § 40, and regulations 310 CMR 10.00 thereunder, as they may be amended.

Section 13 - Appeals:

A decision of the Commission shall be reviewable in the Superior Court in accordance with G.L. Ch. 249, § 4.

Section 14 - Severability:

1. This By-law shall apply to flows entering the Town's Municipal Storm Drainage System and Waters of the Commonwealth of Massachusetts.

B. Construction and Post-Construction Activities

1. Any construction activity, including clearing, grading, and excavation that will disturb equal to or greater than one acre of land or will disturb less than one acre of land but is part of a larger common plan of development or sale that will ultimately disturb equal to or greater than one acre of land draining to the Town municipal separate drain system without a Stormwater Management Permit from the Enforcement Agency. After the initial common plan construction activity is completed for a particular parcel, any subsequent development or redevelopment of that parcel would be regarded as a new plan of development. For example, after a house is built and occupied, any future construction on that lot (e.g., reconstructing after fire, adding a pool or parking area, etc.), would stand alone as a new common plan for purposes of calculating acreage disturbed to determine if a Stormwater Management Permit is required. Construction activity does not include routine maintenance that is performed to maintain the original line and grade, hydraulic capacity, or the original purpose of the site.

2. Exemptions.

- a) Construction activities waived from permit coverage under the NPDES General Permit for Stormwater Discharges from Construction Activities.
- b) Normal maintenance and improvement of land in agricultural use as defined by the Wetlands Protection Act regulation 310 CMR 10.04;

Any powers granted to or duties imposed upon the Authorized Enforcement Agency may be delegated in writing by the Authorized Enforcement Agency to employees or agents of the Authorized Enforcement Agency.

SECTION 6 - Regulations.

The Authorized Enforcement Agency may adopt and periodically amend rules and regulations, not inconsistent, herewith, to effectuate the purposes of this By-law. Said regulations may include but shall not be limited to provisions regarding: administration; application requirements and fees; permitting procedures and requirements; design standards; surety requirements; inspection and site supervision requirements; waivers and exemptions; and enforcement procedures. Failure by the Authorized Enforcement Agency to promulgate such rules and regulations shall not have the effect of suspending or invalidating this By-law.

SECTION 7 - Enforcement.

The Authorized Enforcement Agency or appointed designee shall enforce this By-law and any regulations, orders, violation notices, enforcement orders, and permit conditions on behalf of the Town, and may pursue all civil and criminal remedies for such violations pursuant thereto.

A. Civil Relief. If a person violates the provisions of this By-law, regulations, permit, notice, or order issued there under, the Authorized Enforcement Agency may seek injunctive relief in a court of competent jurisdiction restraining the person from activities which would create further violations or compelling the person to perform abatement or remediation of the violation.

B. Orders.

1. The Authorized Enforcement Agency or an authorized agent of the Authorized Enforcement Agency may issue a written order to enforce the provisions of this By-law or the regulations there under, which may include:

- a) Elimination of illicit connections or discharges to the municipal storm drainage system;
- b) Performance of monitoring, analyses, and reporting;
- c) That unlawful discharges, practices, or operations shall cease and desist; and
- d) Remediation of contamination in connection therewith.

2. If the Authorized Enforcement Agency determines that abatement or remediation of contamination is required, the order shall set forth a deadline by which such abatement or remediation must be completed. Said order shall further advise that, should the violator or property owner fail to abate or perform remediation within the specified deadline, the Town may, at its option, undertake such work.

C. Criminal Penalty. Any person who violates any provision of this By-law, regulation, order or permit issued there under, shall be punished by a fine of not more than \$300 for each violation. Each day or part thereof that such violation occurs or continues shall constitute a separate offense.

D. Non-criminal Disposition. As an alternative to criminal prosecution or civil action, the Town may elect to utilize the noncriminal disposition procedure. The penalty for the 1st violation shall be \$100. The penalty for the 2nd violation shall be \$200. The penalty for the 3rd and subsequent violations shall be \$300. Each day or part thereof that such violation occurs or continues shall constitute a separate offense.

E. Entry to Perform Duties Under this By-law. To the extent permitted by state law, or if authorized by the owner or other party in control of the property, the Authorized Enforcement Agency or Inspectional Services Department, its agents, officers, and employees may enter upon privately owned property for the purpose of performing their duties under this By-law and regulations and may make or cause to be made such examinations, surveys or sampling as the Authorized Enforcement Agency deems reasonably necessary.

F. Appeals. The decisions or orders of the Authorized Enforcement Agency shall be final. Further relief shall be to a court of competent jurisdiction.

G. Remedies Not Exclusive. The remedies listed in this By-law are not exclusive of any other remedies available under any applicable federal, state or local law.

SECTION 8 - Severability.

The provisions of this By-law are hereby declared to be severable. If any provision, paragraph, sentence, or clause, of this By-law or the application thereof to any person, establishment, or circumstances shall be held invalid, such invalidity shall not affect the other provisions or application of this By-law.

SECTION 9 - Transitional provisions.

Residential property owners shall have 90 days from the effective date of this By-law to comply with its provisions provided good cause is shown for the failure to comply with this By-law during that period.

B. Illicit Connections. No person shall construct, use, allow, maintain or continue any illicit connection to the municipal storm drainage system, regardless of whether the connection was permissible under applicable law, regulation or custom at the time of connection.

C. Obstruction of Municipal Storm Drainage System. No person shall obstruct or interfere with the normal flow of stormwater into or out of the municipal storm drainage system without prior written approval from the Authorized Enforcement Agency.

SECTION 2 - Exemptions.

The following exemptions are applicable to 705.02, Section 1.

15. Discharge for which advanced written approval is received from the Authorized Enforcement Agency as necessary to protect public health, safety, welfare or the environment.

SECTION 3 - Emergency Suspension of Municipal Storm Drainage System Access.

The Authorized Enforcement Agency may suspend municipal storm drainage system access to any person or property without prior written notice when such suspension is necessary to stop an actual or threatened discharge of pollutants that presents imminent risk of harm to the public health, safety, welfare or the environment. In the event any person fails to comply with an emergency

suspension order, the Authorized Enforcement Agency may take all reasonable steps to prevent or minimize harm to the public health, safety, welfare or the environment.

SECTION 4 - Notification of spills.

Notwithstanding other requirements of local, state or federal law, as soon as a person responsible for a facility or operation, or responsible for emergency response for a facility or operation has information of or suspects a release of materials at that facility or operation resulting in or which may result in discharge of pollutants to the municipal drainage system or waters of the Commonwealth of Massachusetts, the person shall take all necessary steps to ensure containment, and cleanup of the release. In the event of a release of oil or hazardous materials, the person shall immediately notify the Fire and Police Departments, Board of Health, and the Department of Public Works.
