

Town of Saugus Historical Commission

Town Hall 298 Central Street Saugus, MA 01906

CULTURAL RESOURCES INVENTORY

Updated: May 2012

The Town of Saugus contains hundreds of sites and structures having architectural, archeological, or historical significance. At the present time, five properties are listed on the <u>National Register of Historic Places</u>, two of which have been designated as <u>National Historic Landmarks</u> (NHL) by the Secretary of the Interior.

National Register Properties:

- Boardman House (NHL, 10/15/1966)
- Breakheart Reservation Parkways (8/11/2003)
- Lynn Fells Parkway (5/9/2003)
- Saugus Iron Works (NHL, 10/15/1966)
- Saugus Town Hall (6/20/1985)

The Commission completed an <u>Inventory of Cultural and Historical Resources</u> in 1986. This inventory was largely confined to resources that were at least 50 years old, and did not include many additional resources reflecting the growth of the Town since World War II. The results of this inventory have been entered into the Massachusetts Historical Commission's <u>MACRIS</u> database. With a few exceptions, the inventory forms, along with inventory records created by other federal and state agencies, are available for downloading from the MACRIS site (http://mhc-macris.net/).

The following listing is in two parts. The first lists properties included in the MACRIS database, while the second shows those properties which the Commission has identified for potential inclusion in the inventory. This includes both older properties not included in the previous inventory and those which have achieved the 50 year age criteria since the initial survey was done. It should be noted that the list of potential additions will expand as individual properties within areas are inventoried or miscellaneous residential properties are identified as being significant either as architecture or association.

Both lists are divided into five resource types: Areas/Streetscapes; Buildings; Burial Grounds; Objects; and Sites/Structures. It should be noted that in some cases there is apparent duplication between the areas

and sites categories, the difference being that areas are larger and more generalized than sites. Objects tend to be features such as monuments. Because of their sensitivity, archeological sites are not shown.

The listings in the Buildings category have been arranged in alphabetical order by address in order to make finding the property easier; the other categories are either arranged by the MACRIS number or alphabetically by name.

It should be noted that the property addresses and names have been updated since the 1986 inventory and may not agree with the address and/or name shown in the MACRIS database. Part of future inventory work will be to revise such forms to reflect the current terminology.

The MACRIS number is officially preceded by "SAU." (e.g., SAU.900). In a few cases, inventory numbers have been changed from those on the forms as originally submitted by the Commission in keeping with MHC policies.

The Property Status column denotes whether the property still exists, has been demolished, or, in a few cases, replaced (e.g., the Veterans Memorial School). In many of the latter instances, the replacement should be inventoried since in many cases it will qualify for inclusion in its own right either when it achieves the 50 year age or qualifies for less-than-50-year significance. Properties included on the potential additions list marked as demolished represent judgments made prior to demolition; in many cases, such properties will be documented as part of areas (e.g., former commercial buildings on the U.S. Route 1 Commercial Strip).

The Listing Column indicates whether the property has been listed (Official) or is proposed for listing (Potential). Where a property is on the National Register (NR) or is a National Historic Landmark (NHL), those designations appear in place of "Official." When an individual building or structure is listed in a National Register district nomination, whether it is considered as Contributing (C) or Non-Contributing (N) to the significance of the district is also shown.
