Article 13

Water Hydrants and Valves

For several years the Water Division of the Department of Public Works has been replacing or repairing failed hydrants and valves as well as installing valves for better control of the water system. The department conducts the design, bidding, and construction with the staff of the Water Division resulting in significant savings. An appropriation of \$200,000.00 is requested to fund the ongoing improvements.

The source of funding for this appropriation is a borrowing authorization.
