Article 9

Sewer Lift Station – Capital Improvements

This article will provide funding for design and permitting for the repair/replacement of the Lynnhurst lift station and force main leaving the Lamplighter Way lift station. The Lynnhurst lift station is in need of being replaced as it is over 25 years old. Its proximity to very sensitive environmental receptors, such as the City of Lynn water supply makes this of particular concern. This appropriation will be used to determine what type of lift station is needed (wet well, dry pit as is there now, or a submersible station as was constructed on Morris Place a few years ago) as well as design and permitting for the same. Construction would begin in 2025 for which an appropriation will be sought once the design is complete.

The source of funding is a borrowing authorization in the amount of \$700,000.00.
