

Special Town Meeting  
April 8, 2019

Article 1  
Sidewalks

This appropriation of \$310,000.00 will provide funding for new concrete sidewalks, grass strips and granite curbing on one side of Highland Avenue.

As part of the ongoing capital improvements to the Town of Saugus water infrastructure, the 2019 project will include the replacement of approximately 1,000 linear feet of water line and a water main on Highland Avenue. This will replace a water main that has had multiple breaks as well as to improve flow for the new Middle School/High School and fire protection as recommend in the Water Master Plan. As a result of these capital improvements being completed, the Town can now make the necessary improvements to the sidewalk on Highland Avenue to provide safer travel for pedestrians such as students and residents. This project will have a positive impact on the entire neighborhood.

The funding source for this appropriation will be a borrowing authorization.
