

Article 10: Streetlight Relocation

The Town of Saugus has been notified that at this time there are several double poles that the utilities like Verizon are trying to address and remove. On those old poles are streetlights and fire alarm cables that are required to be relocated to the new poles before other utilities can complete their transfer and the old pole removed. The Town of Saugus is responsible for the relocation of the streetlight fixtures and while those are addressed we can take the opportunity to remove the fire alarm cables.

Based on an estimate for services for the relocation of the light fixture to the new pole, remove the fire alarm cables, and replace the light fixture if needed we are requesting \$45,000.00 so we can begin this work.

The funding source of this appropriation is free cash.
